Clinifast Nutritional Products

Clinifast supplements provide meal replacement and hunger control and can be used as a health shake or mixed with other foods. These delicious health shakes, at about 50 calories per serving, provide nearly everything you need and typically receive from regular meals, allowing you to reduce the caloric intake from table food without sacrificing the nutrition you need.

Clinifast products are used for weight reduction and maintenance; providing supportive nutrition for many, including those with nutritional challenges such as athletes, children, expectant mothers, diabetics; and for all who choose to add a delicious, easy to use and effective source of high quality nutritional insurance to their daily dietary intake.

Clinifast supplements provide a scheduled source of easily absorbed protein and nutrients with no fat, sugar, or caffeine. Sodium and calories are minimal and nutrition is supplied throughout the day, avoiding yo-yo energy and blood sugar levels. Instead of feeling hungry, you feel satisfied and in control.

Clinifast health shake supplements can be mixed with any sugar-free liquid you choose, allowing you the option of personalizing your flavors.
